Aeronáutica

Put your brand to take off in the market.

Position your business at
MRO

Brasil 2023 , Aeronautical
Maintenance International
Fair

Aviation is returning to airports, airspace and moving hangars.

It's time to get your brand on the radar of the aircraft maintenance business, being part of the gear that makes business spin at high speed.

Opportunities can be found inside and outside the hangars, in a sector that involves professionals, aeronautical and support companies, financing, management and much more.

The largest MRO event in Brazil and the most important civilian and military exhibition in Latin America.

MBF Maintenance Brasil 2023 is the main event for the national aeronautical maintenance, repair and overhaul industry in Brazil.

A fair specially designed to foster interaction and exchange of experiences with the biggest and most important players in the sector in Brazil and worldwide.

By bringing together companies and professionals that are fundamental to make the aeronautical market to take off, the fair was formatted as a business event, full of opportunities to meet decision-makers and suppliers.

Opportunities inside and outside the hangars

on a segment that put together people, companies, management, financing institutions, and much more.

A fair that is also dedicated to exchange experiences, with space for personal and business networking, which gives access to a large portion of the knowledge accumulated in the sector.

The place is São Paulo, which concentrates most of the market, a city that breathes aviation everywhere.

The right time and place for business

This event brings together market players and the entire business chain at the best moment: the first half of 2023, when we are witnessing the gradual recovery of the economy, the return of passengers and the sector warm-up.

Aeronáutica

A market that lives up to your brand

Brazil has one of the five largest aeronautical markets in the world.

- 3rd World's largest civilian aviation system.
- 5th world's largest aviation market (Embraer is the 3rd world's largest aeronautical industry).
- 4th world's largest aeronautical maintenance business.

In this market, aeronautical maintenance activities are an essential part. Both military and civilian, they are essential to ensure the safety and airworthiness of all aircraft with the minimum possible costs.

Brazil's aviation in numbers and the maintenance market

675 maintenance shops

522 in Brazil and 153 outside the
country, all ANAC certified.

- 2nd largest general aviation fleet
- 3rd executive airplanes fleet
- 2nd largest helicopters and ag plane fleet
- 2nd largest airport network

(4,000+ airports and airstrips)

These are important services to support air transport in a country like Brazil, with a large territory and strong civilian and military air traffic connecting all regions. Because of that our maintenance sector is the 4th largest in the world.

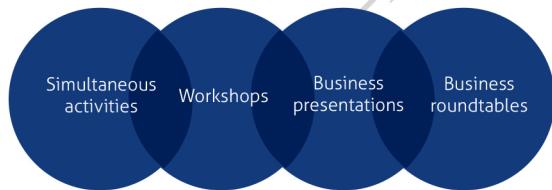

MRO

BRASIL Feira Internacional
de Manutenção
Aeronáutica

Aligned with one of the five most important maintenance segments in the world, we built MBF Maintenance Brazil 2023 as a meeting focused, mainly on business. This is the right place for your brand and to grab the opportunities on the most important military and civilian Latin American maintenance event.

How the event works

Besides being an exhibition, the event brings conferences, speeches, seminars, forums where the segment's main topics are presented and analysed by businessmen, users, and aeronautical authorities.
